

Lives depend on our translations.®

## Legal Language Services

### **Precision Language Solutions for Legal Professionals:**

For nearly three decades, GLTaC has been the trusted partner for legal professionals seeking expert language services. Our comprehensive translation and interpretation solutions are specifically designed to meet the complex linguistic challenges of the legal industry, ensuring accuracy and clarity across patent filings, depositions, and international legal communications.

### **Certified Translations: Your Litigation Lifeline**

GLTaC provides meticulously accurate, court-certified translations that empower your legal proceedings. From patent filings to deposition transcripts and discovery materials, our translations ensure precision where every word matters.

### **Interpretation Solutions Tailored to Your Needs**

We offer flexible interpretation services designed to meet the dynamic demands of legal communication:

- Over-the-Phone Interpretation (OPI): Instant access to expert linguistic support
- Video Remote Interpretation (VRI): Enhanced communication with visual context and document sharing capabilities
- In-Person Interpretation: On-site expertise for critical legal interactions, including depositions and client meetings

GLTaC linguists bring invaluable real-world legal expertise, combining professional backgrounds as paralegals and attorneys with specialized knowledge in intellectual property, global regulatory frameworks, business law, and financial legal domains. Quality control and project management take place in our Midland, Michigan headquarters. Client feedback from a recent deposition stated, "The interpreter was the most professional interpreter we have ever worked with." GLTaC's reputation for accurate, certified translations delivered on or before the due date stands out among Language Service Companies (LSCs).

### **Unmatched Quality and Reliability**

Our commitment to excellence is validated by:

- ISO 9001:2015 Certification
- ISO 17100:2015 Certification
- ASTM 3130-18 Compliance
